Subject: Unsolicited Political Faxing

Commissioners,

I am strongly against the FEC's request to the FCC to allow unsolicited political faxing. Just like I do not want to pay for the cost of my paper and ink used by unsolicited stock tip fax scams, my family has no desire in subsidizing political parties by paying their bills for my expendables that they would using without my permission. Isn't that stealing?

The political parties already have more "freedom of speech" than the normal citizen has. I see no reason to allow them to have yet another way invade my home and my privacy, to pummel my family with more unsolicited drivel, and give me the "honor" of paying for it.
